COMPANY

LUSOTUFO

Encompassing more than 80 years of experience and expertise, Lusotufo is the largest floorcovering group in the Iberian Peninsula and is capable of developing and supporting a wealth of solutions in the decorative market. Its core business is focused in the field of wall to wall carpet and rugs.

**80 years
providing solutions**

Our vast collection provides a quality solution for a variety of styles and tastes incorporating a combination of materials, textures and finishes

SERVICE

It is LUSOTUFO's main concern to present its customers with the best solutions in a way that the style and performance of wall to wall carpets are adapted to the characteristics of the project.

Our company is also oriented to provide personalised design projects, from traditional elegance to a minimalistic style.

The capacity and flexibility of our Production Division combined with the technical service of a specialised design team, allows us to provide you personalised solutions of wall to wall carpets and rugs for all kinds of projects for all dimensions at competitive prices.

The portfolio of modern and traditional designs provides the initial inspiration, that can however be adapted.

Although we possess an abundance of designs with available options, we also offer a complete service that allows the creation of original designs, adjusted to customer needs.

This means that we can supply you with specific solutions for interior designers, architects and constructors with complete solutions to face demanding building patterns of any commercial, public or private scenario.

As part of our personalised design service, Lusotufo develops CAD simulations, presenting colours and textures as defined by the customer.

As necessary, we supply samples produced in the "Kibby" robot machine dedicated to the production of high precision prototypes.

IMO

OPTIONAL

UNSETTLED WATERS REQUIRE SPECIALISED AND HIGH QUALITY CARPETS

Seagoing vessels require flooring with very specific characteristics and Lusotufo offers carpets that meet diverse requirements such as the all important fire resistance classification as defined by the International Maritime Organization* (IMO) for marine carpet enabling Lusotufo marine floorcovering to be installed in any craft regardless the size.

Carpets play a very important role in the interior environment of these vessels providing welfare and comfort for crew and passengers alike, ensuring a warm and pleasant environment and substantially enhancing the acoustic and thermal behavior of cabins and common areas. The quality and diversity of Lusotufo marine carpet facilitates easier decision making by architects, designers and engineers.

At Lusotufo there is always a solution for your space!

* IMO, the International Maritime Organisation is the United Nations specialised agency responsible for the protection and safety of shipping and the prevention of maritime pollution from shipping. (visit website <http://www.imo.org/>)

**SCOTCHGARD**

TREATMENTS

**THE BEST WAY TO PROTECT
YOUR CARPET FROM SPILLS
STAINS AND DIRT**

Scotchgard treatment is the best way to protect your carpet from spills, stains and dirt.

Scotchgard forms an invisible shield around every fibre, keeping your furnishings looking fresh and making them easier to clean and care for.

Scotchgard is extremely durable and gives lasting protection even in the most demanding conditions.

Scotchgard does not alter the colour, texture or flame retardancy, so even the most delicate silks can be treated with confidence.

Anti-static agents prevent the attraction of dry soils to carpets and fabrics, ensuring quick and effective everyday cleaning.

Spills are simply mopped up by absorbent paper or a clean towel – even dried in stains are easy to remove.

WOOL BENEFITS

A natural animal fibre resultant from the shearing of sheep. Wool has been in constant use since the Stone Age and has evolved from a crude fibre in length to a finer offering in today's market dependent upon the breed selected from livestock producers.

COMPLETELY NATURAL

Natural

Wool is grown year-round by million sheep, consuming a simple blend of water, air, sunshine and grass.

Biodegradable

When a wool fibre is disposed of, it will naturally decompose in soil in a matter of years, slowly releasing valuable nutrients back into the earth.

Renewable

Every year sheep produce a new fleece, making wool a completely renewable fibre.

SOFT AND COMFORTABLE

Soft

Wool fibres are extremely fine, enabling them to bend far more than traditional, coarser wool fibres. This makes wool feel soft and luxuriously gentle next to your skin.

Elastic

Natural elasticity helps wool garments stretch with you, yet return to their original shape.

Breathable

Wool fibres can absorb large quantities of moisture vapour then move it away to evaporate into the air. So wool is extremely breathable and less prone to clamminess.

Warm and cool

In contrast to synthetics, wool is an active fibre that reacts to changes in body temperature. So it helps you stay warm when the weather is cold, and cool when the weather is hot.

Static resistant

Because wool can absorb moisture vapour, it tends not to create static electricity, helping it to drape beautifully and be less likely to cling uncomfortably to your body than other fabrics.

EASY TO CARE FOR

Washable

Recent innovations mean many wool garments can now be machine-washed and tumble dried, providing a simple solution to the common question of 'How to wash wool?'

Stain resistant

Wool fibres have a natural protective outer layer that helps prevent stains from being absorbed. And because wool tends not to generate static, it attracts less dust and lint.

Anti-wrinkle

At microscopic level, each wool fibre is like a coiled spring that returns to its natural shape after being bent. This gives wool garments a natural resistance to wrinkles.

Odour resistant

In contrast to synthetics, wool can absorb moisture vapour which means less sweat on your body. Wool even absorbs the odour molecules from sweat, which are only released upon washing.

REASSURINGLY SAFE

Fire resistant

Wool's inherent chemical structure makes wool naturally flame resistant. It is a highly trusted natural fibre in public areas such as hotels, aircraft, hospitals and theatres. Wool is harder to ignite than many common textile fibres. Whilst cotton catches alight at 255°C, the temperature must reach 570-600°C before wool will ignite; while polyester melts at 252-292°C and nylon succumbs at an even lower 160-260°C, wool never melts so it can't stick to the skin like many common synthetics.

UV resistance

Wool provides good protection from the sun, compared with the protection from other fibres. As a natural fibre, evolved over millions of years to protect sheep against the elements, wool absorbs UV radiation providing protection from the sun.

GRAPHICS

HIGH QUALITY CARPETS

Simple geometric designs,
using 2, 3 or 4 colours,
provide the option for
a significant variety of patterns
and colour variants.

High quality,
luxury and durability
like Axminster carpets
but with lower cost

In the pictures displayed we can
observe the computer generated
graphics and the correspondingly
produced wall to wall carpet.

REAL

**Flexibility in manufacturing,
generates wall to wall carpets with patterns
that are simple and exclusive.**

Flexibility in the appearance through
the intermingling of different colours,
textures and types of yarns permits
the manufacture of wall to wall on a
bespoke basis, with exclusive patterns.

This is the most universal method
using a simultaneous needle yarn system
on a polypropylene backing.

MAINTENANCE

The implementation of an adequate cleaning and maintenance regime from the time of installation of your commercial carpeting, makes it possible to safeguard your carpets appearance, enhance the image of your installation and ensure continued high performance throughout its life cycle. To ensure the carpet will last longer and look better just follow the three basic rules of carpet maintenance: vacuum regularly; remove spills immediately; professionally clean as required (usually no more than once every year or two).

INSTALLATION	Vacuum the old carpet before it is removed, to help eliminate dust. The surface should be plane, dry and clean. Ensure prior to installation the carpet is completely stretched to minimise wrinkling and rippling.
--------------	---

TREATMENT Scotchgard (Option)

Scotchgard protection preserves your carpet from the risks of soiling and staining, making it easy to care for your carpets or rugs, preserving their looks for a longer period of time.

TREATMENT IMO (Option)

This product can have a special treatment to comply with the Council Directive of the European Union 96/98/EC of 20 December 1996 on marine equipment.

TREATMENT ANTI MOTH (Option)

This product can have a special treatment with natural anti-moth product

LUSOTUFO® reserves the right to amend any technical details without prior notice.

LUSOTUFO reserves the right to eliminate any collection from this leaflet without prior notice.
A deviation of about 10% from the specified measurements and colours can occur.
The colours of the actual products may slightly differ from those shown.

Small marks, veins and shade variations that may be appreciated on these products,
are not faults, but they are typical characteristics of natural furs.
It's advisable professional cleaning.
